

JEAN SERGIO RODRIGUES

Shift Supervisor

Date of birth: September 27th, 1973

Nationality: Brazilian

Additional Languages: Advanced English, Advanced Spanish

Education Background:

- University/Federal Technical of the Brazil (1994)

Safety courses and qualifications:

- HUET. Brazil
- CBSP. Brazil
- BOSIET RelyOn Nutec
- OGUK Global Medic OPITO
- NR 06 - Personal Protective Equipment - PPE
- NR 10 - Security in Facilities and Electricity Services
- NR 10 - Complementary - Safety in the Electrical Power System (SEP) and its surroundings
- NR-12 - Safety at Work in Machines and Equipment
- NR 13 - Safety in the Operation of Process Units
- NR 20 - Advanced I - Safety and Health at Work with Flammables and Combustibles
- Defensive Driving and First Aid
- L.O.T.O - Blocking and Tagging Dangerous Energies
- RIGPass RelyOn Nutec
- LOLER RelyOn Nute
- LOE RelyOn Nutec
- H2s RelyOn Nutec
- Seaman Books Bahamas
- Pre-Mobilization Safety Inductions. SBM Offshore
- Lifesaving Rules 1. SBM Offshore

- Life Saving Rules 2. SBM Offshore
- Process Safety Management. SBM Offshore
- Permit to Work Procedure. SBM Offshore
- Performing Authority Permit Vision. SBM Offshore
- Compliance. SBM Offshore
- Tuberculose. SBM Offshore.

Professional experience:

2021 - 2023 - **ESOM ENGIE SERVICE**

- Operations and Maintenance Supervisor

- Maintenance and Operation of Natural Gas Pipeline. Responsible for the maintenance and operation team in the pipeline range, with more than 250 km of lines.

- Responsible for managing contracts, tools, instruments, operation planning, P.I.G operation, interface control room, resolve all equipment issues on lease and all production and book issues, complete work authorization permits when required, consultations of hazards, complete task observations/hazard identifications, gas detection and monitoring reports all spills/incident.

- Daily inspection and reporting of regular and operational equipment on site, Reports for all regulatory requirements and issues Single point of contact for deficiencies regulatory and for first calls (ground disturbances), gas migration testing Interference discontinuation (process organization) Immediate inspection (dealing with deficiencies)

- Well startup (service request forms Well component isolation, SWM controls and maintenance of existing insulation, installation and general maintenance of piping/plugs Ensure engine fluid levels, cleaning of radiators and engines Start cat- a-dyne heaters, annual checklists and heat traces Team consisting of diverse Technicians, Operators, Engineers . Management to avoid shutdown failures, routine inspection of regulators, safety valves and high pressure in behaviors.

- Alignment with the communities where the gas pipeline passes along the right-of-way.

- Direct contact with environmental institutions and regulatory bodies. Operation from the refinery to the point of delivery to the state/regional gas operator Monitoring, control, inspection and supervision of execution.

2017 - 2019 - **KOSAN CRISPLANT MAKEEN ENERGY**

- International Supervisor Electromechanical

- Management Maintenance Support Contractual Service Requests from all maintenance assets and field operations, welders, mechanical staff.

- Assembly of machines and terminals. LNG, LPG gas units, Filling machines, transport, Gas Leak Detection, Compressors, Pipelines, pumps, Rotating machines Lubrication.

- Planning Various clients: YPF, Petrobras, Repsol, Gasbol, Gasco Argentina, Chile, Bolivia and Venezuela.

2017 - 2017 – **ENERRAY S.P.A**

- Site Supervisor Mechanical

- Monitoring and inspection Preventive and corrective maintenance Coordinating OEM subcontractors for equipment maintenance, Identifying problems and developing corrective action plans scheduling and execution of preventive and predictive maintenance, execution and follow-up of all aspects of installation, repair, maintenance, supervision and on-site modifications as needed Electrical, hydraulic, mechanical and inspection, testing, repair and troubleshooting according to your specifications.

- Providing field operation reports, status and constructive feedback as requested. Certifying and reviewing that all O & M activities carried out at the project sites meet OEM (Original Equipment Manufacturer) requirements and warranties Register and report all failures, deficiencies, and other unusual occurrences, as well as time and materials Spending on work orders.

- Responsible for all necessary repairs, maintenance and monitoring of all warranty claims
Typical Qualifications Expected.

- Direct supervision in subcontracts Expat team , Italy, Espanish ,Russian severals teams Europeans citizens.

Work visas 2016 – **Faststream U.S.A Project Subsea Venezuela P.D.V.S.A**

- Expatriate Chief Mechanic Hydraulic Subsea Barge Pipeline Vessel R.O.V IMCA

- Schedule and supervise corrective, preventive and predictive maintenance activities, with the objective of maintaining the rig, cranes, workshop and its equipment in adequate operating conditions.

- Team maintenance: Welders, electricians, instrumentalists, mechanics, junior technicians. Ability to troubleshoot Cat 3500 series engine overhaul issues with technician knowledge.

- Ability to perform Condition Assessment of Drilling Equipment such as Drawworks, Mud Pumps, Rotary, Crown Block, Top Drive, Anchors.

- Ability to troubleshoot and repair air compressors, vacuum compressors, agitators, centrifugal pumps, pneumatic cranes, derricks, forklifts, drilling vehicles.

- Ability to understand, troubleshoot and repair hydraulic systems and associated equipment such as hydraulic winches, hydraulic hoists, hydraulic cylinders, hydraulic clamps, BOP and BOP Hydraulic control unit.

2012 -2014 – **Skanska Group Constructions Project Offshore Cranes Lifting Specialist.**

- Maintenance constructor Supervisor

- Contract management evaluating the working time of personnel and equipment, availability of third-party purchase contracts for materials and equipment. Terms in contracts mainly with Petrobras alignments Joint operation with several clients in Halliburton, Baker and Schlumberger operations managing time and costs for Offshore Units operations.
- Program and supervise the activities of Team Equipment Mechanics, Electricians, Crane and Instrumentation Operators, Supervise corrective, preventive and predictive maintenance activities, aiming to maintain platforms, vessels and Jack up cranes and their equipment in adequate operating conditions.
- Reviews and processes Maintenance support Contract service work requests from all asset maintenance departments and operations and field maintenance, sections, warehouse, workshop Schedule and supervise installation services involving construction machinery and equipment, facility fit-out and electro-hydraulic-pneumatic layout, to expand and improve equipment capacity and productivity. Scheduling of preventive, corrective and predictive maintenance stops of the machine for maintenance, in order to minimize the non-productive time of the equipment.
- Develop work procedures for corrective/preventive maintenance, making changes and adjustments as necessary. Supervise the receipt and inspection of maintenance materials, ensuring compliance with specifications.
